A lot of people use free hosting to get started in understanding fundamentals of web design, programming and coding.

To that end we encourage anyone just starting (and even you veterans of web development) to check out this list from Mashable.

40+ Web Design and Development Resources for Beginners
mashable.com

Breaking into web design can be a daunting task. Here's an overview and list of resources that are essential to a

Remember, backup your site data at least once per month to your computer, this will help you tremendously if you ever delete a file, database or otherwise need access to your files for restoration purposes.

Now, in vistaPanel, you have the ability to control some common PHP configuration options directly such as magic_quotes, time zone and even MB String options!

Check it out now!

PSA: If you get an email today that says you've won $1000 and it involves rewards2012 or any other domain for that matter, you're being scammed.

Optimize your site today with Google PageSpeed, find out where your slowdowns are and how to fix them!

PageSpeed Insights — Google Developers
developers.google.com

PageSpeed Insights analyzes the content of a web page, then generates suggestions to make that page faster. Reducing page load times can reduce bounce rates and increase conversion rates.

Ever been told crons are not supported on free hosting by anyone? Guess what? They are now!

We now have support for running scripts via cronjobs at timed intervals available in vistaPanel!

Like · Comment · Share

9 people like this.

View all 6 comments

Byethost Free Webhosting Rodolfo you talking about the cronjobs? If so, it's quite simple, you login to your vistaPanel, select Cronjobs, select the site the job is going to be on and then you simply provide the file and timing information for what to run and when.
July 23 at 7:35pm · Like

Daniel Yount Thanks, for the free hosting, Its the best I had found and I have been on a bunch. Gives me a chance to build my site up and use it an outfacing calling card. A Lot of extra functionality not just CRONs you normally don't get on a free host. Keep up the great work.
